### Case Study: How SpectrumBPO Transformed a Supplement Brand

A mid-sized health and wellness brand selling dietary supplements approached SpectrumBPO with a problem. Despite spending heavily on ads, their ACoS (Advertising Cost of Sales) was eating into profits, and sales had plateaued. Their campaigns lacked structure, they were targeting the wrong keywords, and a significant portion of their budget was wasted.

#### Step 1: Detailed Audit and Restructuring

SpectrumBPO's experts began by auditing the account to uncover inefficiencies. They found overlapping keywords, weak ad copy, and campaigns that were competing against each other. By restructuring campaigns, segmenting keywords, and refining budgets, the team created a solid foundation for profitable growth.

#### Step 2: Smarter Keyword Targeting

The team conducted in-depth keyword research to identify high-converting terms while eliminating wasted spend on irrelevant searches. This helped the brand appear in front of its ideal audience and improve ROI quickly.

### Results: Growth Beyond Expectations

Within just 90 days of working with SpectrumBPO, the supplement brand saw impressive changes:

- ACoS reduced by 35%, significantly boosting margins.
- Overall sales grew by 70% compared to the previous quarter.
- Their ads achieved first-page visibility on competitive search terms, outpacing competitors.
