Signs Your Floors Need Refinishing

The Refinishing Process Explained

Understanding what happens during refinishing can ease concerns about the process. Here's a breakdown of what professionals typically do:

1. **Inspection and Preparation** – The flooring team inspects your hardwood to identify problem areas. They then prepare the space by removing furniture and protecting surrounding surfaces.
2. **Sanding** – This step removes the old finish and smooths out scratches, dents, and imperfections.
3. **Staining (Optional)** – Homeowners can choose to change the floor's color or enhance its natural tone with a fresh stain.
4. **Sealing and Finishing** – Finally, professionals apply protective coatings to add shine and guard against future damage.

The result? A flawless floor that looks as good as the day it was installed.
