

Galvanized Steel Export of Vietnam: The Latest Trade Analysis of 2024

Galvanized steel products are a category of items that are specifically made from steel and are coated with a protective layer of zinc. These are a top priority for the globally leading traders due to the physical barriers and their widespread use in construction and infrastructure. The universal demand across industries and the uneven geographic production, along with the standardized hike in different economies, has maintained its global trade. [Vietnam Import Data](#) says the country in Southeast Asia has gradually emerged as a substantial contributor to the worldwide export market of galvanized steel products because of the growing production capacity and the quality improvements in technological autonomy.

Due to the strong domestic demand and the shift in sourcing by importers, the country has achieved a total export valuation of galvanized steel products worth 4.8 billion US dollars in 2024. The diversification of export destinations and the consistent order backlog based on the consumer base have taken the export bar graph to a great extent.
