Strategy Behind GT's Decision

The decision to bowl first is largely influenced by match conditions. The pitch is expected to be good for batting early on, but dew in the second innings can make bowling difficult.

GT's plan is to restrict MI to a competitive total and then chase it down with their strong batting lineup. This approach has worked for many teams in recent IPL seasons.

Match Momentum After Toss

While the toss plays an important role, execution on the field is what ultimately decides the outcome. MI's batting lineup is capable of posting big scores, which could challenge GT despite their decision to bowl first.

On the other hand, GT's bowlers will aim to pick early wickets and keep the scoring rate under control.
